

EVIDENCE.COM: SECURITY MATTERS

**PROTECT LIFE.
PROTECT TRUTH.**

SPEAKER

Jenner Holden

VP of Information Security

CLOUD, COVERED

- **What is it?**
 - Computing delivery system, using external on-demand & configurable resources.
 - More than half of all agencies are considering or using the cloud

CLOUD VS. ON-PREM

“I think today the better bet is get to the cloud as quick as you can because you're guaranteed almost to have better security there than you will in any private thing you can do.”

— Tony Scott, U.S. CIO

“Gartner has now predicted that security will displace savings and agility as the primary driver for government agencies to move to public cloud “

— Gartner 2016

THE 3 P'S

Our security goes above and beyond in 3 major ways:

- 1. People – our team of experts**
- 2. Practices – what we do**
- 3. Products – the tools we provide**

01

PEOPLE

A DEDICATED SECURITY TEAM

**Our dedicated team focuses solely
on securing your data**

02

PRACTICES

OUR CORE SECURITY PRINCIPLES

- **Control**
 - **Vigilance**
 - **Detection**
 - **Configuration**
 - **Protection**
 - **Education**
 - **Expectation**
-

CONTROL

You own your data

VIGILANCE

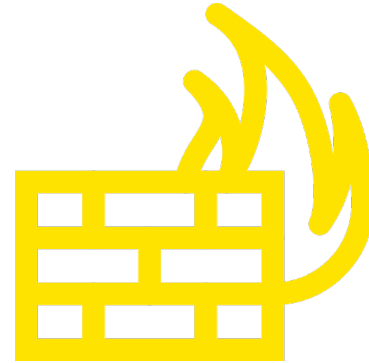

**Prepared for a range
of sophisticated attacks**

DETECTION

**Aware of
new vulnerabilities**

CONFIGURATION

Built to meet industry standards

ISO 27001

CJIS

U.K. Accreditation

CSA Level 1

PROTECTION

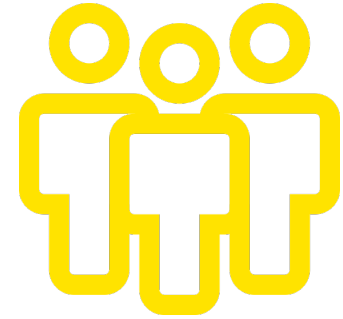

**Physical & logical data
protection**

EDUCATION

**Robust and formal security
training**

EXPECTATION

**We work for you
& you maintain ownership**

03

PRODUCTS

ACCESS CONTROL TOOLS

- Customizable password requirements
 - Lockout duration and timeout settings
 - Challenge questions
 - Role-based and device-level permissions
 - Restrict IP access
 - Multi-factor authentication
-

ACCESS CONTROL TOOLS

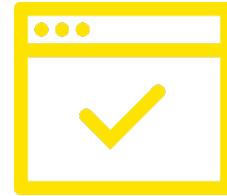

Multi-factor authentication

Log in to Evidence.com.

Access code texted.

Enter code.
Account verified.

ENCRYPTION

In transit & at rest

EVIDENCE INTEGRITY

- **Audit trail: see who has accessed what & when**
 - **Hashing function: ensure no file changes**
 - **Deletion protection: deletion workflow, notification emails, and remorse period**
-

TOP TIPS FOR AGENCIES

- **Pick a company you can trust**
 - **Ask about their info sec program**
 - **Know what security standards they comply with**
 - **Make sure your info is confidential**
 - **Confirm that information integrity is preserved**
-
