

AXON Air

THE UNMANNED AIRCRAFT PROGRAM FOR PUBLIC SAFETY TAKES TO THE SKIES

PARTNER WITH AN INDUSTRY LEADER

Unmanned Aircraft are becoming an important tool to help improve officer safety, provide tactical support, and scene reconstruction. That's why Axon has partnered with DJI, the world's leader in commercial drone technology, to bring industry-leading hardware to public safety. This will give your agency the ability to buy from a trusted partner and leverage the Axon network to ingest drone video in Evidence.com – the same platform that your officers use today. Visit www.axon.com/products/air to learn more.

BENEFITS

PROTECT

Assist with search and rescue, pursuits or situations where monitoring can lead to an effective and safe outcome for parties

AMPLIFY

Cover more ground in search and rescue situations, usable in tough environments with night vision and FLIR camera capabilities

SECURE

Complete chain of custody by securing your video from capture in the field in Evidence.com

AXON AIR EXPANDS YOUR CAPABILITIES

- Search and rescue
- Traffic accident reconstruction
- Crowd monitoring
- Pursuits and building clearings
- Natural disaster responses
- Crime scene analysis
- Next generation evidence collection

ELEVATING UNMANNED AIRCRAFT PROGRAMS FOR PUBLIC SAFETY

As the requirement and demands of unmanned aircraft programs grow, Axon will be partnering with agencies to build out solutions that meet the complexities and requirements of public safety. We will be focusing on situational awareness, advanced evidence collection, and program management tools that allow you to manage your air fleet side-by-side with body camera and in-car video systems.
